What is Rashik - The Awakening about?

Rashik – The Awakening is G. K. M. Jarif Ur Rahim's career, education, technology, and personal-development initiative based in Jashore, Bangladesh. Its stated mission is to help students, professionals, and institutions build meaningful careers while using AI and technology responsibly and maintaining mental and spiritual balance. [1] [2]

What it does

It is described as a "Career & Spiritual Consulting Zone" rather than a conventional school or software company. Its services combine practical career support with AI literacy, digital skills, and purpose-centered personal guidance. [2]

Three pillars

Pillar	Focus
Career Mastery	Career strategy, personal branding, résumé optimization, LinkedIn improvement, interview preparation, professional networking, and job-market navigation. [2]
AI Literacy	Practical AI education, AI-assisted workflows, digital-identity work, website support, and workshops for individuals and teams. [2]
Spiritual Awakening	Life coaching, spiritual consultation, mental-wellness guidance, purpose discovery, and holistic development grounded in wisdom and mindfulness. [2]

The vision

Rahim describes The Awakening as a movement to help people in Bangladesh "rise above mediocrity," adopt technology with wisdom, and create careers that benefit both the individual and society. In other words, it links professional success with ethical responsibility, social contribution, and inner purpose. [1]

Who it is for

The initiative targets students, job seekers, professionals, and institutions. It appears especially aimed at people seeking career direction, practical AI skills, personal branding, or support in balancing work ambitions with wellbeing and spiritual values. [2] [1]

Related projects

Rashik also connects to **baZar.rashik**, an e-commerce platform offering curated products and services for its community. The broader Rashik ecosystem includes educational content, career-guidance resources, AI-related projects, and publications such as *The Iqra Book* on responsible AI and human agency.[2]

In plain terms

Rashik – The Awakening is essentially a **career-and-life development platform with an Islamic/spiritual orientation**. It combines conventional career coaching and AI education with a philosophy that success should be guided by purpose, ethics, mental health, and service to society.[1] [2]
